# Solaris IT Solutions Company Profile

*Solaris IT Solutions solves your  
unique, complex problems making  
your business run faster, smoother  
and more efficiently.*

SOLARIS

## Company

Solaris IT Solutions is an information technology company that provides IT solutions for businesses internationally and locally. We have 15 years of experience in rendering and providing professional application, web development, marketing, branding and software applications across Malaysia and the countries around the globe. We provide the most comprehensive application suite to empower organizations to increase business performance at all levels and to maximize industry-mandated compliance and corporate governance programs.

Headquartered in Kuala Lumpur, we have successfully implemented projects of different sizes and complexity in various business and technology domains. Capitalizing on the accumulated experiences, Solaris IT Solutions provides full-cycle services ranging from business analysis and consulting to project implementation and support.

Solaris IT Solutions along with its extensive network of international partners, provides hosting, implementation, post-sales support and validation services for all solutions to ensure that customers get the maximum value from their investments.

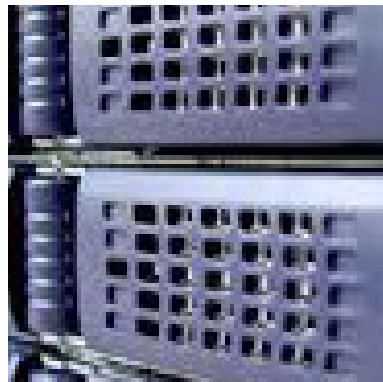

## Overview Our Company

Solaris IT Solutions is one of the few IT system integration, professional service and software development companies in Malaysia that works with Enterprise systems and companies. As a privately owned company, Solaris IT Solutions provides IT Consultancy, software design and development as well as professional services and hardware deployment and maintenance to the following verticals:

Financial Services (banking and clearing house)  
Telecommunications - Energy and Utilities  
Health Care - Education - Real Estate - Colleges

For over 15 years we've helped businesses run more smoothly, be more productive, save money, reduce wasted time and overcome hurdles by solutions to their unique web and software needs. When a client's situation requires a solution that can't be bought in a box or off shelf that's where we come in - that's what we do. We'd like the opportunity to do the same for you.

## Our Company Mission

Our Mission is to provide custom software development that solves the unique web and software challenges holding your business back, slowing you down and standing in the way of your company's progress.

Solaris IT Solutions' mission includes:

1. Providing high quality software development and consulting services
2. Making access to information easier and secure (Enterprise Business)
3. Improving communication and data exchange (Business to Business)
4. Providing our customers with Value for Money Services

- *A partner of choice for our clients by:.*

- ▶ Adding value to customer projects or business
- ▶ Building strong customer confidence in our products
- ▶ Delivering services based on real World needs

## A couple of things about our team

### Our Customer Comes First

We are good listeners. Our Team will work closely with our customers to understand their business needs and requirements prior to starting their projects.

We ask a lot of questions. These questions help both of us to realize the exact problem, need, solution. And, deliver to the customers what they need.

Our Team will not rush to close the project until our customers are happy. To date, we have completed 100 percent of all projects started, with 100 percent customer satisfaction.

## Empowering Your Business

Solaris IT Solutions has over 15 year's experience in providing professional application, web development, and web marketing services for clients across the globe. We have successfully implemented projects of different sizes and complexity in various business and technology domains. Capitalizing on the accumulated experience Solaris IT Solutions provides full-cycle services ranging from business analysis and consulting to project implementation and support.

# Work Processing

We strategize our work process according to our clients needs. Each client is different and we dynamically cater to our clients needs in our work process flow to suite our clients

## Process no 01

Understanding Requirements and Brainstorming your needs and solutions.

## Process no 02

Wireframing. We start with sketch mock-ups to have an idea about what will come where. Such pen-paper sketches help to find out any missing elements. It allows clarification of all features.

## Process no 03

Prototype  
Prototypes help you to know how your product will exactly look like.

## Process no 04

Development: After having a clear design, we write well structured algorithms & code to build a flawless end product.
